FOR THE LOVE OF Scans

Hello readers, this here is my first scanlation... it doesn't have the quality of other scans since I'm both using freely obtained RAWs and skipping out on the cleaning of them due to personal time constraints.

I'm mostly doing this as constructive practice for my japanese. As you read these, you may come to discover how much of a novice I am at this. But be assured, the translations made are "Accurate enough". There shouldn't be any inconstancies later on.

I may or may not release more after vol 2 due to work, but I'll work towards that goal

thankyou for reading and enjoy
